- **Existing concrete structures**
- **Durability and life time**
- **Sustainability**
- **Innovative building concepts**
- **Challenging projects**
- **Historic concrete**

### Project presentations

The organization introduces a new idea for a *fib* symposium! On Tuesday June 13, 2016 there will be additional special sessions on interesting concrete structures. People from practice are invited to submit a project description of max. 200 words and two photos. Those that are accepted to present their project at the symposium will be asked to supply a three page description including interesting photo's. It will be possible to register for only the Tuesday to learn about interesting projects and taste the ambiance of a *fib* symposium!

Abstracts should have a length between 200 – 300 words, must relate to the scope of the conference and need to be written in clear English. Authors of accepted abstracts will receive instructions on the preparation of full-length papers. All submitted abstracts and papers will be fully peer-reviewed by the International Scientific Committee. Accepted papers will be published in the conference proceedings and authors will be required to give an oral presentation at the event.
